

CFTechnology.org is a non-profit organized exclusively for charitable, scientific, and educational purposes, to provide the cystic fibrosis community with education, learning tools, and improved access to genetic testing, healthcare products, and product information.

Gathering Patient Insights...We are CURE-E-US!

CFTechnology.org Community Survey: October 2017-April 2018
 Participants: n=1,212 53% Cystic Fibrosis Patients 43% Caregivers

Q: How do you keep your medical records?

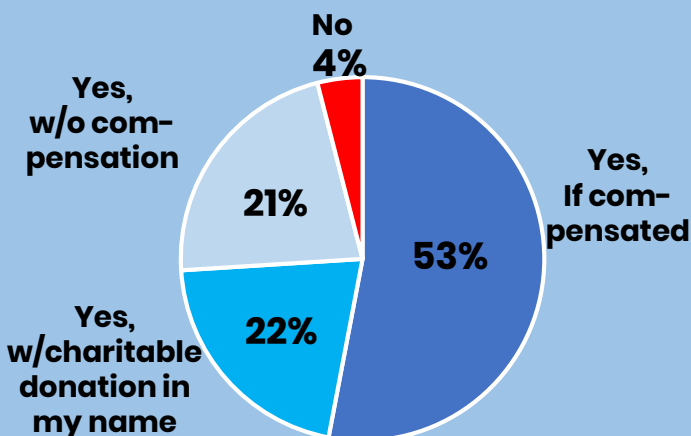

Q: What data are you willing to collect?

Medication Use	84%
Spirometry Results	83%
Genetic Mutations	82%
Lab Cultures	79%
Hospitalizations	70%
In-Home Treatments	64%
Diet / Nutrition	61%
Microbiome Analysis	44%
Air Quality	43%

Data privacy, security and monetization are significant issues!

	Pts.	CGs
I would want to know if the app company sells my data	68%	78%
I would stop using the app if my data were sold without my permission	62%	74%
I would be concerned with the apps privacy policy	52%	59%
I would be concerned about where the data is stored (i.e. data cloud)	49%	53%
I would keep using the app if I received some revenue from monetization	49%	39%

Q: Are you willing to share your data?

In their own words...

“Private Industry is going to benefit financially and compensation levels the field. The potential wealth in genomic data is beyond comprehension.”

“Depends on who gets the data and how they use it.”

“Compensation does not have to be monetary. Assistance with treatment, at home equipment costs is always helpful.”
